

BAHRAIN DEVELOPMENT BANK B.S.C. (c)
Risk and Capital Management Disclosures
For the period ended 30 June 2026

These disclosures have been prepared in accordance with the Public Disclosure Module ("PD"), CBB Rule Book, Volume I for Conventional banks.

These disclosures have been reviewed by the Bank's external auditors Ernst & Young - Middle East, based on agreed-upon procedures as required under Para PD-A.2.4 of the PD Module.

1 EXECUTIVE SUMMARY

This report has been prepared in accordance with Pillar 3 disclosure requirements prescribed by the Central Bank of Bahrain, herein referred to as “CBB”. The report has been designed to provide Bahrain Development Bank B.S.C. (c) (“BDB” or the “Bank”) and its subsidiaries (together, the “Group”), stakeholders with detailed information on the Bank’s approach in managing capital and risk, having due regard to the operating environment.

The Bank applies the Basel framework in the measurement of its capital adequacy, and in its capital management strategy and risk management framework. CBB’s Basel III capital rules and guidelines became effective on 1st January 2015 as the common framework for the implementation of the Basel Committee on Banking Supervision’s (Basel Committee) Basel III capital adequacy framework for banks incorporated in the Kingdom of Bahrain.

BDB has adopted the Standardized Approach for Credit Risk, Market Risk and the Basic Indicator Approach for Operational Risk to determine the capital requirement.

The disclosures in this report are in addition to the disclosures set out in the consolidated financial statements for the period ended 30 June 2026 presented in accordance with the International Financial Reporting Standards (IFRS) by the International Accounting Standards Board (IASB).

2 INTRODUCTION TO THE BASEL III FRAMEWORK

The CBB’s capital adequacy framework is based on three pillars consistent with the Basel III framework developed by the Basel Committee, as follows:

- Pillar 1: calculation of the Risk Weighted Assets (RWAs) and capital requirement.
- Pillar 2: the supervisory review process, including the Internal Capital Adequacy Assessment Process (ICAAP).
- Pillar 3: rules for the disclosure of risk management and capital adequacy information.

CBB CAPITAL ADEQUACY RULES:

CBB minimum required total capital adequacy ratio (including Capital Conservation Buffer “CCB”) is 12.5 percent, compared to 10.5 percent recommended by the Basel Committee. Moreover, the CCB is newly introduced limits and minima by Basel III, such as minimum Common Equity Tier 1 Capital Ratio “CET1” of 9 percent (including CCB) and minimum T1 Capital Ratio of 10.5 percent (including CCB).

The table below summarizes the approaches available for calculating RWAs for each risk type in accordance with the CBB’s capital adequacy framework:

Credit Risk	Market Risk	Operational Risk
Standardised Approach	Standardised Approach Internal Models Approach	Basic Indicator Approach Standardised Approach

i) Credit Risk

Credit Risk represents the potential financial loss as a consequence of a customer’s inability to honour the terms and conditions of a credit facility. Such risk is measured with respect to counterparties for both on-balance sheet assets and off-balance sheet items. The Bank has credit risk management architecture in place which is further explained in Section 5 within this document.

2 INTRODUCTION TO THE BASEL III FRAMEWORK (continued)

CBB CAPITAL ADEQUACY RULES: (continued)

i) Credit Risk (continued)

The Bank does not use any external credit assessment institutions and the risk rating for the exposures are based on the internal credit framework and policy guidelines of the Bank.

For regulatory reporting purposes, BDB is using the Standardised Approach for credit risk.

ii) Market Risk

Market Risk is the risk of potential losses arising from movements in market prices of financial instruments as a result of changes in market rates (such as interest rates and foreign exchange rates).

For the regulatory market risk capital requirement, BDB is using the Standardised Approach for the calculation of regulatory market risk capital.

iii) Operational Risk

Operational Risk is the risk of monetary loss on account of human error, fraud, systems failures or the failure to record transactions. In order to manage and mitigate such risks, the Bank ensures that proper systems and resources (financial and personnel) are available to support the Bank's operations. Proper segregation of duties and other controls (including reconciliation, monitoring and reporting) are implemented to support the various operations and activities.

For the regulatory operational risk capital requirement, BDB is using the Basic Indicator Approach for the calculation of regulatory operational risk capital.

Regulatory Reforms

The Bank is operating as a retail bank with special waivers under a license issued by the Central Bank of Bahrain ("CBB"), with headquarters and branches in Bahrain. The Bank's capital adequacy requirements are computed on a consolidated basis.

3 GROUP STRUCTURE

The Group's financial statements are prepared and published on a full consolidation basis, with all subsidiaries being consolidated in accordance with IFRSs. As at 30 June 2026, the Group consists of the Bank and its following subsidiaries:

Name	Country of Incorporation	Principal activity
Bahrain Business Incubator Centre W.L.L.	Kingdom of Bahrain	Development and assistance to emerging Bahraini entrepreneurs
Al-Waha Venture Capital Fund Company B.S.C.	Kingdom of Bahrain	Trusts, Funds and Similar Financial Entities - Fund Company
Neotech W.L.L. (under liquidation)	Kingdom of Bahrain	Management consultancy activities
National SMEs Growth Fund Co. B.S.C Closed	Kingdom of Bahrain	Providing financial facilities to small and medium enterprises.

Restrictions on capital and transfer of funds within the Group

Since the Bank's subsidiaries are not regulated financial institutions, there is no regulatory impediment to the transfer of retained earnings to the Bank. However, as a separate legally incorporated entity, the transfer of paid in capital and mandatory reserves would require shareholder action. As the major shareholder (either direct or indirect) in the entity, the Bank has the power to undertake the legal processes for the transfer of such capital. The Bank's subsidiaries are registered and domiciled in Kingdom of Bahrain and there are no exchange controls or other restrictions on the transfer of funds.

(Expressed in Thousands Bahrain Dinars)

4 CAPITAL STRUCTURE AND CAPITAL ADEQUACY

The Bank's regulatory capital base comprises of (a) CET 1 capital which includes share capital, reserves and retained earnings. (b) Tier 2 capital which consist of general loss provisions.

Capital structure, minimum capital and capital adequacy

The Bank's paid up capital consists only of ordinary shares and does not have any other type of capital instruments.

The Bank's shareholders are Government of Kingdom of Bahrain (89.53%), Social Insurance Organisation (5.23%) and Pension Fund (5.24%, together).

The Bank's regulatory capital base is as detailed below:

	As at 30 June 2026
Common Equity Tier 1 (CET1)	
Issued and full paid ordinary shares	63,669
Legal / Statutory reserve	1,270
Retained earnings	68
Current period Profit	793

5 CREDIT RISK – PILLAR 3 DISCLOSURES

This section describes BDB's exposure to credit risk, and provides detailed disclosures on credit risk in accordance with the CBB's Basel III framework, in relation to Pillar 3 disclosure requirements.

Definition of exposure classes

The Bank has a diversified funded and unfunded credit exposure. These exposures are classified as standard portfolio per CBB's capital adequacy requirements.

Brief description of applicable standard portfolio is as follows:

a. Claims on sovereigns:

These pertain to exposures to governments and their central banks. Claims on Bahrain and GCC sovereigns are risk weighted at 0%. Claims on all other sovereigns are given a risk weighting of 0% where such claims are denominated and funded in the relevant domestic currency of that sovereign. Claims on sovereigns, other than those mentioned above are risk weighted based on their credit ratings.

b. Investment in securities and sukuk:

Investments in listed equities are risk weighted at 100% while unlisted equities are risk weighted at 150% and significant investment in the common shares of financial entities >10% are risk weighted at 250%.

c. Claims on banks:

Claims on banks are risk weighted based on external rating agencies (S&P, Moody's, Fitch and Capital intelligence). Short-term claims on locally incorporated banks are assigned a risk weighting of 20% where such claims on the banks are of an original maturity of three months or less and the claims are denominated and funded in either Bahraini Dinars or US Dollar.

Preferential risk weighting that is one category more favourable than the standard risk weighting is assigned to claims on foreign banks licensed in Bahrain of an original maturity of three months or less denominated and funded in the relevant domestic currency. Such preferential risk weight for short-term claims on banks licensed in other jurisdictions are allowed only if the relevant supervisor also allows this preferential risk weighting to short-term claims on its banks.

No claim on an unrated bank would receive a risk weight lower than that applied to claims on its sovereign of incorporation.

Claim on Banks, other than those mentioned above, are risk weighted based on their credit rating.

d. Claims on corporates:

Claims on corporates are risk weighted based on credit ratings. Risk weighting for unrated (corporate) claims are assigned at 100%.

For corporates owned by the Government of Bahrain, are risk weighted at 0%.

e. Impairment of assets:

The Bank assesses at each reporting date whether there is any objective evidence that a specific financial asset is impaired. A financial asset is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred 'impairment event') and that impairment event (or events) has an impact on the estimated future cash flows of the financial asset that can be reliably estimated. Evidence of impairment may include indications that the borrower is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that it will enter bankruptcy or other financial reorganisation and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

f. Restructured financing facilities:

Where possible, the Bank seeks to restructure facilities. This may involve extending the payment arrangements and the agreement of new financing facility conditions. Management continuously reviews renegotiated financing facilities to ensure that all criteria are met and that future payments are likely to occur. The financing facilities continue to be subject to impairment assessment, calculated using the facility's original effective interest rate.

5 CREDIT RISK – PILLAR 3 DISCLOSURES (continued)**g. Past due exposures:**

This includes claims, for which the repayment is overdue for more than 90 days. The risk weighting for such loans is either 100% or 150%, depending on the level of provisions maintained against the assets, net of interest in suspense.

h. Equity Portfolio:

Investment in securities and financial entities are risk weighted at a minimum risk weight of 100% for listed entities or 150% for unlisted entities, unless such investments exceed 10% of the eligible capital of investee entity, in which case they are deducted from the Bank's capital.

i. Other assets:

These are risk weighted at 100%.

j. Holding of real estate:

All other holdings of real estate by banks (i.e. owned directly, subsidiaries or associated companies or other arrangements such as trusts, funds or REITs) are risk-weighted at 200%. Premises occupied by the Group are risk-weighted at 100%.

k. Related party transactions and balances:

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions. Related parties include entities over which the Bank exercises significant influence, major shareholders, directors and executive management of the Bank. Most related parties exposure are zero interest (Refer note 15 of the half yearly reviewed consolidated financial statements as at 30 June 2026). All related party transactions are approved by Board of Directors.

Amounts due from related parties are unsecured.

l. Highly leveraged counterparties:

The Bank does not lend to highly leveraged and other high risk counterparties as defined in PD-1-3-24(e).

Restructured Credit Facilities

As at 30 June 2026, the Bank has a total gross balance of BD 13,788 thousand with an ECL of BD 4,474 thousand relating to restructured credit facilities. During the period, the Bank has restructured credit facilities amounting to BD 274 thousands with ECL of BD 102 thousand. Restructuring concessions mainly related to deferral of loan installments to assist customers overcome temporary cash crunch situations or to realign the repayment with the borrower's revised cash flow projections.

The above restructuring did not have a significant impact on the present or future earnings and were primarily extensions of the loan / financing tenor.

BAHRAIN DEVELOPMENT BANK B.S.C. (c)

Basel III Pillar 3 Disclosures

For the period ended 30 June 2026

(Expressed in Thousands Bahrain Dinars)

14 CREDIT RISK MITIGATION

The reduction of the capital requirement attributable to credit risk mitigation is calculated in different ways, depending on the type of credit risk mitigation. The main collaterals taken for risk mitigation on credit exposures are deposits held by customers, residential / commercial property mortgage, investment securities, counter-guarantees from other banks, Tamkeen guarantees etc. However, for purposes of capital adequacy computation, only eligible collateral recognized under Basel III is taken into consideration.

15 ELIGIBLE FINANCIAL COLLATERAL AND GUARANTEES

Eligible financial collateral, and guarantees, presented by standard portfolio are as under:

	Gross credit exposure	Financial collateral	Credit exposure after credit risk mitigant
As at 30 June 2026			
Sovereigns	87,884	-	87,884
Banks	8,166	-	8,166
Corporates	81,077	18,146	62,931
Regulatory retail	798	-	798
Past due and credit impaired exposures	16,618	13,562	3,056
Investments in equities/funds	6,201	-	6,201
Holding of real estate	11,603	-	11,603
Other assets and cash items	3,339	-	3,339
	215,686	31,708	183,978

Tamkeen guarantees a percentage of the outstanding balance of Islamic financing in accordance with the agreement between the Bank and Tamkeen. Moreover, agriculture and fisheries loans are guaranteed by the Government of Bahrain through Ministry of Finance and National Economy.

17 MARKET RISK, INTEREST RATE GAP

Market risk

Market risk is defined as potential adverse changes in the fair value or future cash flows of a trading position or portfolio of financial instruments resulting from the movement of market variables, such as interest rates, currency rates, equity prices and commodity prices, market indices as well as volatilities and correlations between markets. As its primary tool, the Bank measures its market risk exposure using the Standardised Approach under Basel III.

The Bank uses the Standardised Approach for calculating market risk capital charges for the following market risk components:

- Equity exposure risk
- Interest rate exposure risk
- Foreign currency exposure risk
- Commodity risk

The Bank's market risk capital charge is largely composed of foreign currency risk arising from the Bank's foreign exchange exposure on investments denominated mainly in Kuwaiti dinars, Saudi riyals and United States Dollars, and interest rate risk arising on the bond portfolio. The capital requirement for market risk using the Standardised Approach as at 30 June 2026 was as follows:

Risk Type	Capital requirements		
	2026	Maximum	Minimum
Foreign exchange risk capital	18	18	8
			30 June 2026
Total Risk Weighted Exposure for Market Risk			225

Interest rate risk

Interest rate risk arises from the possibility that changes in the interest rates will affect future profitability or the fair values of the financial instruments. The Bank is exposed to interest rate risks due to mismatches of interest rate repricing on maturity of assets and liabilities. Positions are monitored periodically to ensure that this is maintained within the established limits. The Bank's assets and liabilities reprice only on maturity.

The Bank's interest rate sensitivity position is based on the maturity dates, as follows:

	Up to 1 month	1 to 3 months	3 to 6 months	6 months to 1 year	1 to 5 years	Over 5 years	Non-interest bearing	Total
2026								
Assets								
Balances with Central Bank of Bahrain	6,159	-	-	-	-	-	1,789	7,948

21 OPERATIONAL AND LEGAL RISKS

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people, and systems or from external events. While operational risk is inherent in all the Bank's activities and cannot be fully eliminated, it is actively managed to minimize potential losses and protect stakeholders' value.

The Bank has established an operational risk management framework that enables the identification, assessment, monitoring, and mitigation of operational risks across all business and support functions. Key elements of this framework include risk and control self-assessment, Key Risk Indicators (KRIs), operational risk incident reporting and management, new product & services review processes, and ongoing monitoring of control effectiveness.

Operational risk management follows a clear governance structure. Business and support units are primarily responsible for managing operational risks within their respective areas, supported by documented policies, procedures, and internal controls. Core control principles include – but not limited to- segregation of duties, defined authorization limits, and reconciliation processes. The Operational Risk Management function provides oversight ensuring alignment with the Bank's overall risk appetite and regulatory requirements.

The Internal Audit department provides independent assurance on the adequacy and effectiveness of internal controls, risk management practices, and governance processes. It conducts regular audits across all business and support units and reports significant findings and control deficiencies to senior management and the Audit Committee.

Given the Bank's relatively focused business model and scale of operations, transaction volumes and client exposures are moderate, however, robust controls and monitoring mechanisms are maintained to manage associated risks effectively.

For regulatory capital purposes, the Bank adopts the Basic Indicator approach in measuring operational risk under the capital adequacy framework. In addition, the Bank maintains internal ICAAP limit of 16% compared to regulatory capital requirement of 12.5%, to absorb potential unexpected losses.

Legal risk is the risk arising from the potential that unenforceable contracts, lawsuits or adverse judgments can disrupt or otherwise negatively affect the operations of the group. The Group has developed controls and procedures to identify legal risks and believes that losses will not be material.

22 FINES AND PENALTY

	Amount in BD Actual 2026
Penalty paid to Central Bank of Bahrain	-

23 LIQUIDITY COVERAGE RATIO (LCR)

According to LM-11.1.2 under the “Liquidity Risk Management Module” in the CBB Rulebook, the Bank has calculated the Liquidity Coverage Ratio, which is at 613% as on 30 June 2026.

24 LEVERAGE RATIO (LR)

According to CA-15.5.1 under the “Leverage Ratio & Gearing Requirements” Module in the CBB Rulebook, the Bank has calculated the Leverage Ratio, which is at 26.5% as on 30 June 2026.
